SteckO<sup>R</sup> Products

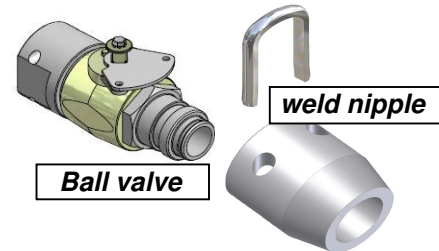

### Product

Parker SteckO<sup>R</sup> fitting connections are quick coupling connections developed for the Hydraulic market. Products involved are high pressure hoses, adapters, ball valves etc.

SteckO consists of a leakfree soft seal connection in size 1/4" up to 2" bore diameter and a working pressure up to 450 bar.

**Documentation**     *2280-B25UK,  
HY4410-SO/US*

**website**            *<http://www.stcbv.nl/>*

### Market

SteckO fitting connections are succesfully applied in mobile Industry. Advantages are a reliable leak free soft seal connection, compact construction, fast assembling capacity and a wide product range.

### Your Added Value

- Cost**            *Lower cost with a quick and compact assembling on production line requirements*
- Quality**        *According to EN standards and 100% leakfree connections*
- Other**           *Fast check on right assembling,  
Effective maintenance system  
Optimal flow bore*
